ROOFING SHEET FOR OUR AUSTRALIAN CUSTOMERS

Because we flat pack the Chicken Caravan to fit into a box that is 2.85 meters long, we have 21 separate roof sheets packed with every CC450 unit. To make assembly easier, we would recommend that you source roof sheet at your end.

If you organize the roof sheet yourself there will be a few benefits:

1. You are able to buy longer sheets as you are not limited to the size of the shipping crate.
2. These longer sheets will be a lot easier and faster to install.
3. Longer sheets means not as many joins and over laps.
4. You will only need either 3 or 6 large sheets, rather than 21 smaller ones.
5. The roof won't require additional bracing.

The roof sheet you would need to buy is a product made by Lysaght called "Trimdek". You will need 3 sheets that are 3525 mm long, and 3 sheets that are 4610 mm long. Alternatively you can also get 3 panels that are 8020 mm long, so you won't have a join in the middle.

We recommend sourcing the 'Zincalume' finish.

The difference in pricing between sourcing your own sheet or continuing with the supplied sheet is \$550 inc GST.

You can find product information for Trimdek at their website, including Supplier information:
