ROOFING SHEET FOR OUR NEW ZEALAND CUSTOMERS

Because we flat pack the Chicken Caravan to fit into a box that is 2.7 meters long, we have 21 separate roof sheets packed with every CC450 unit.

To make assembly easier, we have found some roof sheet in New Zealand that you could use.

If you organize the roof sheet yourself there will be a few benefits:

1. You are able to buy longer sheets as you are not limited to 2.7 m shipping crate.
2. These longer sheets will be a lot easier and faster to install.
3. Longer sheets means not as many joins and overlaps.
4. You will only need either 3 or 6 large sheets, rather than 21 smaller ones.
5. The roof won't require additional bracing.

The roof sheet you would need to buy is called "Veedek".

You can get either 3 lengths at 8020 mm long, or if it is hard to transport, you can get 3 lengths at 4610 mm and 3 lengths at 3525 mm. These will be overlapped when they are screwed down.

You can find more product information and suppliers from the Dimond Roofing website:
