ROOFING SHEET FOR OUR UNITED STATES CUSTOMERS

Because we flat pack the Chicken Caravan to fit into a box that is 2.9 meters long, we would normally have 21 short roofing sheets and a roofing jig packed on a separate pallet with every CC450 unit, but with all international customers we have discounted the price to exclude the roofing sheets and jig.

Therefore, to make assembly easier, we have found some roof sheet in the US that you could use.

If you organize the roof sheet yourself there will be a few benefits:

1. You are able to buy longer sheets as you are not limited to 2.7 m shipping crate.
2. These longer sheets will be a lot easier and faster to install.
3. Longer sheets means not as many joins and overlaps.
4. You will only need 3 large sheets rather than 21 smaller ones.
5. The roof won't require additional bracing.
6. Freight costs remain low due to less weight and cubic volume

The roof sheet you would need to buy is three sheets of PBR-Panel at 26ft 3<sup>3</sup>/<sub>4</sub>in long.

Here are the product details:
